

Leadership Drivers & Natural Aptitudes

Meridian Dynamics · Executive Team — 5 People

SAMPLE REPORT — illustrative output built with fictional names for demonstration; not a real individual or team assessment.

MARCUS BELL Strategist · Judgment · Curiosity · Perspective	PRIYA NAIR Pathfinder · Judgment · Perspective · Leadership
DANA WHITFIELD Stabilizer · Kindness · Prudence · Leadership	ANDRE COSTA Catalyst · Perspective · Curiosity · Leadership
LENA FORD Challenger · Curiosity · Perspective · Creativity	

The headline. This is a 5-person team, spanning the Vision, Flow, Delivery regions. Together you are strongest in patience, logic and vision.

REGIONS COVERED 3 of 3 Vision, Flow, Delivery	TEAM BLIND SPOT — thinly held	STRENGTHS 7 dimensions well held	ADD A PROFILE — covers the gap
--	--	---	---

Each trait scored against the population norm on one shared ruler — bars are directly comparable between teammates.

Each teammate's natural profile as a within-person shape. Where everyone's bar on a row is short, the team shares a blind spot on that dimension.

Everyone Against the Norm

Each individual report scales that person so their strongest dimension reads 10, which makes profiles unreadable against each other. This report instead scores every teammate against the **population norm**: the chart on the previous page shows that as standard deviations from the norm, and the table below shows it as a percentile, so a single shared scale lets the whole team be read on one ruler.

Raw intensity partly reflects how broadly a profile is expressed; the shape chart above controls for that.

Where everyone lands against the norm (percentile)

Dim	Marcus	Priya	Dana	Andre	Lena	Team
DR Drive	27th	78th	17th	54th	90th	Covered
SE Social	10th	56th	51th	76th	56th	Covered
PA Pace	9th	93th	34th	23th	71th	Covered
SO Structure	24th	78th	39th	47th	47th	Covered
CB Creative	24th	52th	10th	44th	84th	Covered
LA Logic	40th	92th	7th	56th	71th	Covered
VI Vision	21th	66th	8th	66th	91th	Covered

Percentiles are each person's standing against the population norm. The Team column reads Covered (someone sits above the norm), Thin (the best is only near it) or Exposed (everyone below it). Exposed rows are tinted.

The Team on the Field

Your natural archetypes are Marcus, Priya, Dana, Andre and Lena as Strategist, Pathfinder, Stabilizer, Catalyst, Challenger. On the value-stream field they cluster like this:

Where the team sits on the value-stream field

Filled glyph = each person's natural archetype; outline = where their role pulls them. Empty regions are the team's structural gaps.

The team spans the whole value stream.

You have natural coverage across Vision, Flow and Delivery — a rare balance. The task is to use it: route work to whoever is home in that region rather than whoever is nearest.

Where the strain sits right now

On the strain screen, Priya, Dana, Andre and Lena have headroom. Balance intense pushes accordingly — lean on the headroom, protect the ones running hot, and reopen the caged strengths rather than piling on more load.

Coverage Map: Who Anchors What

For each dimension, who the team’s go-to is and whether the capability is well held, thin, or a gap.

Dimension	Team’s go-to	Status	What it means for the team
DR Drive & Independence	Lena (90th)	Covered	Well held — Lena anchors it with backup (90th percentile).
SE Social Energy	Andre (76th)	Covered	Well held — Andre anchors it (76th percentile).
PA Pace & Patience	Priya (93th)	Covered	Well held — Priya anchors it with backup (93th percentile).
SO Structure & Order	Priya (78th)	Covered	Well held — Priya anchors it (78th percentile).
CB Creative Battery	Lena (84th)	Covered	Well held — Lena anchors it (84th percentile).
LA Logic & Analysis	Priya (92th)	Covered	Well held — Priya anchors it with backup (92th percentile).
VI Vision & Ideas	Lena (91th)	Covered	Well held — Lena anchors it (91th percentile).

Team strengths.

The team is well held on patience, logic, vision, drive, creative energy, structure and social energy — go-to people: patience (Priya); logic (Priya); vision (Lena); drive (Lena).

AI-oversight anchor.

Marcus has the team’s highest AI-oversight readiness (9/10) — the natural person to lead tool adoption and judge when automated output is trustworthy for the group.

Complementary Pairs: Who Covers Whom

A complementary pair is two teammates where one sits **above** the norm on a dimension the other sits **below** — so one naturally covers the other’s gap rather than duplicating the same strength. The 4 strongest pairings on this team are ranked below by how much their profiles interlock (and how few blind spots they share).

#	Pair	Complement	What interlocks — and what to watch
1	Marcus + Lena Strategist · Challenger	One-way	Lena covers Marcus’s drive, patience, creative energy and vision.
2	Marcus + Priya Strategist · Pathfinder	One-way	Priya covers Marcus’s drive, patience and structure.
3	Dana + Lena Stabilizer · Challenger	One-way	Lena covers Dana’s drive, creative energy, logic and vision.
4	Priya + Dana Pathfinder · Stabilizer	One-way	Priya covers Dana’s drive and logic.

Marcus + Lena is the strongest pairing, though it runs mostly one way — Lena covers Marcus more than the reverse, so pair them where Lena’s strengths lead.

Blind Spots & Points of Friction

1. Tempo runs wide.

Priya and Lena hold a steadier keel while Marcus and Andre run fast and urgent — a 2.86-point spread. Agree cadence explicitly so pace differences read as complementary, not as friction.

2. Relational load sits on one person.

Andre is the only strong relational profile — the team's stakeholder work will concentrate there. Watch for overload and build backup.

Quick-Reference Cards: How to Work With Each Person

One card per teammate — how to get the best from them, what drains them, and how they show up under load.

MARCUS BELL — Strategist

fast, urgent tempo · strain: burnout

✓ HOW TO COMMUNICATE

- Lead with the reasoning and the evidence — give the "why," not just the ask.
- Give them ownership and bring decisions, not just problems — let them drive.
- Frame it around the big picture and the long horizon, not only the next step.
- Keep it concise and get to the point — they move fast.

✗ WHAT TO AVOID

- Don't impose slow, over-deliberate pacing — they move fast.
- Don't demand heavy front-of-house social performance or constant small talk.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Withdraws into solo analysis and can over-engineer alone.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

PRIYA NAIR — Pathfinder

steady, flexible tempo · strain: minimal (has headroom)

✓ HOW TO COMMUNICATE

- Lead with the reasoning and the evidence — give the "why," not just the ask.
- A calm, unhurried delivery lands best; they hold a steady keel.
- Give them ownership and bring decisions, not just problems — let them drive.
- An unhurried, warm delivery lands better than urgency.

✗ WHAT TO AVOID

- Don't demand heavy front-of-house social performance or constant small talk.
- Don't ask for constant reinvention; they prefer depth on proven ground.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Withdraws into solo analysis and can over-engineer alone.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

DANA WHITFIELD — Stabilizer

balanced tempo · strain: minimal (has headroom)

✓ HOW TO COMMUNICATE

- Engage warmly and interactively; they run on people and connection.
- Be organized and specific; give them a clear structure and a defined process.
- A calm, unhurried delivery lands best; they hold a steady keel.

✗ WHAT TO AVOID

- Don't keep it purely abstract; they're grounded in the concrete and execution.
- Don't drown them in dense analysis or data scrutiny — their lightest ground.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- May over-extend on people and neglect their own recovery.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

ANDRE COSTA — Catalyst*fast, urgent tempo · strain: minimal (has headroom)***✓ HOW TO COMMUNICATE**

- Frame it around the big picture and the long horizon, not only the next step.
- Lead with the reasoning and the evidence — give the "why," not just the ask.
- Give them ownership and bring decisions, not just problems — let them drive.
- Keep it concise and get to the point — they move fast.

✗ WHAT TO AVOID

- Don't impose slow, over-deliberate pacing — they move fast.
- Don't ask for constant reinvention; they prefer depth on proven ground.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.
- On contested calls may defer rather than seize ownership.

LENA FORD — Challenger*steady, flexible tempo · strain: minimal (has headroom)***✓ HOW TO COMMUNICATE**

- Frame it around the big picture and the long horizon, not only the next step.
- Give them ownership and bring decisions, not just problems — let them drive.
- Lead with what's new and possible; give them room to generate and reinvent.
- An unhurried, warm delivery lands better than urgency.

✗ WHAT TO AVOID

- Don't bury them in process or documentation for its own sake — their lightest ground.
- Don't demand heavy front-of-house social performance or constant small talk.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

How to Work as a Team

For the team

- **Route work to the natural owner.** Let each strength flow to whoever anchors it — Priya on patience; Priya on logic; Lena on vision; Lena on drive.
- **Pair complementary members.** Put Andre (relational) with Priya (analytical) on stakeholder-heavy, evidence-driven work — front-of-house plus depth.
- **Make decision rights explicit.** It settles both tempo differences and who owns contested calls.

For the leader or coach

- **Put Marcus in charge of AI tooling.** Highest oversight readiness on the team — best placed to govern how the tools get used.

Method note: per-person scores use the LDNA v21 engine. Individual reports normalize each person to their own peak; for cross-person comparison this team view instead scores every dimension against the population norm (the full set of responses collected for this assessment), so all teammates are read on one common scale. "Covered / Thin / Exposed" reads whether anyone on the team sits above, near, or below the norm on each dimension. The suggested profile is the archetype whose typical centroid best covers the team's gap. This is a screen, not a validated team-selection instrument.
