

SAMPLE REPORT — illustrative output built with a fictional name; not a real individual assessment.

Leadership Drivers & Natural Aptitudes

Individual Profile: Devin Marchetti

EXPERT

Strength Themes:
Kindness · Self-Regulation · Perseverance

Pattern: Expert

Devin Marchetti is deeply skilled, methodically precise, and grounded in process - brings rare domain depth and exacting standards to the systems and work an organization depends on.

Your Natural Archetype: Expert

The Expert is the deep specialist, mastery built on structure and standards. The profile is a single tall pillar of Structure & Order with the ideational dimensions deliberately low: this is a person who goes deep and gets it exactly right, not one who reframes the problem. Value is reliability and depth, the trusted authority on the thing that must be done correctly, repeatedly, to standard. Friction comes from ambiguity, constant reinvention, and roles demanding visible vision or persuasion over quiet competence.

Field position. The Expert sits in the Delivery region of the value-stream field (executing and finishing), and carries the work in a manner that is structure-led and methodical.

Typical signature. The typical profile of people who match Expert (seven LDNA dimensions, scored 0–10): elevated on SO (9); low on CB (2), LA (2), VI (2).

Trait anchor. Grounded in Orderliness/Conscientiousness; the canonical structured operator at the top of the Delivery stream (Five-Factor Model).

How Devin Differs from the Typical Expert

Measured against that typical Expert signature, Devin's natural profile sits unusually close, every dimension is within two points of the typical profile, making this a highly representative example of the Expert pattern. Note this is a similarity to the archetype, not a measure of role adaptation: the natural-to-role gap detailed on the following pages can be considerably larger.

How to Read Your Profile: The Seven Dimensions

Each dimension is scored 0–10 from your self-description and maps to an established construct in personality science.

- DR, Drive & Independence.** self-direction and assertiveness, the drive to set your own course (*Extraversion: assertiveness*) High: self-directed, drives own agenda; low: collaborative, takes direction.
- SE, Social Energy.** outward, people-directed energy, warmth and expressiveness (*Extraversion: enthusiasm + Agreeableness: compassion*) High: outgoing, energized by people; low: reserved, task-focused.
- PA, Pace & Patience.** a steady, composed tempo and an even keel under pressure (*Emotional stability (low volatility)*) High: patient, steady under pressure; low: fast, urgent, quick to react.
- SO, Structure & Order.** organization, method, and follow-through on detail (*Conscientiousness: orderliness*) High: organized, methodical, process-driven; low: flexible, improvisational.
- CB, Creative Battery.** sustained mental energy for generating and chasing the new (*Openness (the trait behind creativity and exploration)*) High: restless idea-engine, seeks the new; low: prefers proven, settled ground.
- LA, Logic & Analysis.** reasoning and decisions built on evidence and objective scrutiny (*Openness/Intellect: intellect*) High: rigorous, evidence-led; low: intuitive, feel-led.
- VI, Vision & Ideas.** imagination, abstraction, and big-picture thinking (*Openness/Intellect: openness*) High: abstract, big-picture; low: concrete, execution-focused.

The Adaptation Gap: What It Means

The adaptation gap is the distance between your natural disposition, who you are at rest, and what the current role asks of you day to day. Across the seven dimensions you carry a **low adaptation load**, and the strain leans toward behaviors the role demands beyond your natural baseline. The table below sets each dimension’s natural and role-required level side by side on the same 0–10 scale, so the size and direction of every shift is visible at a glance.

Dimension	Natural	Adaptive	Gap	Interpretation
DR – Drive & Independence	3	3	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.
SE – Social Energy	4	4	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.
PA – Pace & Patience	4	4	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.
SO – Structure & Order	10	10	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.
CB – Creative Battery	1	2	Slight	Role asks for slightly more sustained creative and mental output, a minor, low-cost adjustment.
LA – Logic & Analysis	1	2	Slight	Role asks for slightly more analytical rigor and data-driven reasoning, a minor, low-cost adjustment.
VI – Vision & Ideas	2	4	Moderate	Role calls for noticeably more conceptual range and big-picture thinking, a moderate, ongoing stretch.

Each 0–10 score reflects how saturated that dimension is across the full self-description, scaled so the strongest dimension reads

10. The Gap is the difference between the natural and role-required level, shown as a band: Slight, Moderate, or Large.

What Your Natural Levels Mean

The Gap table above reads the distance between natural and role. This reads the natural levels themselves, who Devin is at rest, before the role acts on it, strongest first.

SO – Structure & Order, 10/10 (very high): a strong pull toward structure: organized, methodical, and detail- and process-driven, with follow-through and order coming instinctively.

SE – Social Energy, 4/10 (moderate): moderate social energy: sociable when needed but equally comfortable heads-down, with relationships mattering without dominating the working style.

PA – Pace & Patience, 4/10 (moderate): a flexible tempo: can hold steady or move quickly as the moment demands, without a strong pull toward either patience or urgency.

DR – Drive & Independence, 3/10 (low): a collaborative, low-assertion default: prefers clear direction and shared ownership to driving the agenda alone, and works best with a defined mandate.

VI – Vision & Ideas, 2/10 (low): a concrete, present-focused orientation: grounded in the tangible and immediate, preferring execution and what-is to speculation and what-if.

CB – Creative Battery, 1/10 (very low): a contained creative battery: energy is best spent on proven ground rather than constant reinvention, preferring depth on the known to chasing the new.

LA – Logic & Analysis, 1/10 (very low): an intuitive, feel-led default: decisions lean on instinct and pattern more than formal analysis, valuing speed and read-of-the-room over exhaustive scrutiny.

Adaptation Shape

Before the detail: the overall shape of Devin's adaptation is **demand-weighted**, the role mainly asks for more than comes naturally, rather than holding natural qualities back. The narrative below traces how that plays out dimension by dimension.

The Work Mask: The Adaptation Story

Devin Marchetti carries a **low adaptation load** between who they are naturally and what their role requires; the strain leans toward behaviors the role demands beyond Devin's natural baseline.

The role pushes hardest on **VI – Vision & Ideas** (conceptual thinking and vision-setting outside their natural frame) and **LA – Logic & Analysis** (analytical rigor and data-driven reasoning that isn't part of their natural toolkit). These are non-natural performances that cost daily energy.

For an Expert, this adaptation pattern means breadth-over-depth roles, frequent context-switching, or ambiguous work that demands pivoting away from proven methods before it can be done properly. The mask is real, and so is the daily cost, sustainability depends on whether recovery matches expenditure.

Strain Signal: Over-extension vs. Suppression

Strain signal: Minimal. Few strain markers are present and the role does not appear to cage the natural energy, so neither the over-extension nor the suppression pattern is pronounced.

The Adapted Pattern

Under role demand Devin's profile stays within the **Expert** pattern, the role asks them to flex within their natural archetype rather than to become a different one. The adaptation cost is about intensity, not identity.

LDNA Value-Stream Field

Profile Narrative & Recommendations

Devin’s Strongest Value to the Organization

Devin Marchetti adds the most value when delivering expert-level work with depth and accuracy generalists cannot match, and maintaining the integrity of the processes, systems, and standards that depend on it. They are who an organization relies on when the stakes require genuine mastery.

Where Devin Experiences Friction in This Role

The clearest friction point is breadth-over-depth roles, frequent context-switching, or ambiguous work that demands pivoting away from proven methods before it can be done properly. The largest single adaptation cost lands on **VI – Vision & Ideas** (performed beyond natural baseline), this is where energy leaks daily.

Practical Recommendations

For Devin Marchetti:

- Stay current in your domain - deep expertise is only valuable if it reflects the present state of the art.
- Document institutional knowledge proactively; what lives only in your head is a single point of failure.
- Build communication bridges to non-specialists - expertise that cannot be explained cannot influence decisions.
- Engage with AI tools as a domain-expert evaluator, not a passive recipient of their outputs.

For Devin Marchetti's Leader:

- Protect their focus time - interruptions and context-switching destroy their highest-value output.
- Use them as the quality and integrity backstop on critical work, not as general-purpose capacity.
- Do not force them into ambiguous, rapid-pivot roles; their strength is depth, reliability, and precision.
- Invest in their development and capture their knowledge - deep expertise takes years to build and is expensive to replace.

Complementary Archetypes

Devin's profile runs lightest in **Creative Battery and Logic & Analysis**. The archetypes below lead with strength in exactly those areas, so they tend to complement Devin on a team, covering the dimensions Devin would otherwise have to stretch into, while Devin contributes the strengths they lack.

Ambassador. The Ambassador is the diplomatic integrator, high on nearly everything, with people-warmth and structure both present. Covers CB, LA.

Pathfinder. The Pathfinder is the analytical navigator, logic and structure pointed at finding the route through. Covers LA.

Promoter. The Promoter is the expressive connector, warmth and enthusiasm fused with idea-energy. Covers CB, LA.

This is general, archetype-level complementarity drawn from where Devin's profile is lightest; it is not a validated pairing. A team report assesses real complementarity against the actual people on Devin's team, including shared blind spots this view cannot see.

Artificial Intelligence (AI): How This Profile Meets AI

Artificial Intelligence is changing which parts of work stay valuable. This section estimates how exposed your work is to automation and where to invest so your contribution stays durable. **Archetype Exposure** is the baseline automation exposure for your pattern. **Your Durable Edge** is your strength in the areas AI struggles to replicate. **AI-Oversight Readiness** is your capacity to direct and check AI tools. The move is to protect your low-exposure strengths and, in the higher-exposure areas, shift from doing the work to directing and validating it.

Archetype Exposure	Your Durable Edge	AI-Oversight Readiness
HIGH	3/10	2/10

Archetype Exposure is the same for every Expert. Your Durable Edge, AI-Oversight Readiness, and every bar below are Devin's individual profile.

AI Exposure Profile, your strength (height) by the work's AI exposure (color)

Bar height is Devin's strength in each area; bar color is that area's intrinsic AI exposure, green is durable human work, amber is rising exposure, red is work AI increasingly performs. Exposure is a property of the work and is the same for everyone; the heights are Devin's own.

Devin's AI-Exposure Breakdown

Devin's most durable, low-exposure strengths are **relational & influence** and **directional judgment**, where human judgment is hardest for AI to replicate. Each of the six areas below carries its own AI-exposure level and a specific move given Devin's strength in it.

Directional Judgment [LOW exposure] · Devin: **3/10**. Setting direction and owning decisions under genuine uncertainty, choosing what matters when there is no clean answer, and being accountable for the call. AI can lay out options and trade-offs, but the accountable decision still belongs to a person, which keeps this low-exposure. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Relational & Influence [VERY LOW exposure] · Devin: **4/10**. Building trust, persuading, navigating conflict, and aligning people, the human-to-human work of moving an organization. This is the most durable capability in

every current exposure study; AI barely touches it. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Generative Ideation [MED-HIGH exposure] · Devin: **2/10**. Producing novel ideas, framings, drafts, and creative synthesis, generating the raw material of new thinking. Generative models are native to this work, so it is now a high-movement exposure zone; the durable part is taste and judgment about which ideas matter, not raw generation.

Analytical Processing [HIGH exposure] · Devin: **5/10**. Structured analysis, data interpretation, evidence evaluation, and documentation, turning information into structured conclusions. This is the single most AI-exposed facet of knowledge work today; computer- and math-type tasks dominate real-world AI usage.

Operational Execution [MED-HIGH exposure] · Devin: **8/10**. Running repeatable systems, coordinating moving parts, and keeping process throughput steady. Workflow and agentic automation targets exactly this layer, so routine coordination is increasingly automatable. **What to do:** This is work AI increasingly performs, and where your effort leaks. The move is from running the process to designing and supervising it: build fluency with agentic workflow automation and in-suite copilots.

AI Oversight [LOW exposure] · Devin: **2/10**. Judging when AI output is trustworthy, catching failure modes before they propagate, and governing how the tools are used. The shift toward augmentation actively creates demand for this, it is the capability AI exposure makes MORE valuable, not less. **What to do:** The destination. This is the one capability AI makes MORE valuable, and where every move above lands: use your oversight to direct the tools through your exposed work rather than be displaced by them.

One Development Move

Devin's top exposure is operational execution (8/10), work AI increasingly performs. The highest-leverage move is from running the process to designing and supervising it: build enough hands-on fluency with agentic workflow automation and in-suite copilots to judge when its output is trustworthy and when it is not, so Devin moves from doing the work to directing and validating it. Watch deskilling, loss of the situational awareness needed to catch the exception.

Because the specific tools and their capabilities change quickly, treat these categories as a starting point: Devin should keep current through their own hands-on research and by working with a coach or advisor on the best practices for their role.

Summary: Devin Marchetti is an Expert, deeply skilled. Their low adaptation load represents real daily energy expenditure. At the archetype level their AI exposure is high; their most durable, low-exposure strengths are relational & influence and directional judgment.
