

SAMPLE REPORT — illustrative output built with a fictional name; not a real individual assessment.

Leadership Drivers & Natural Aptitudes

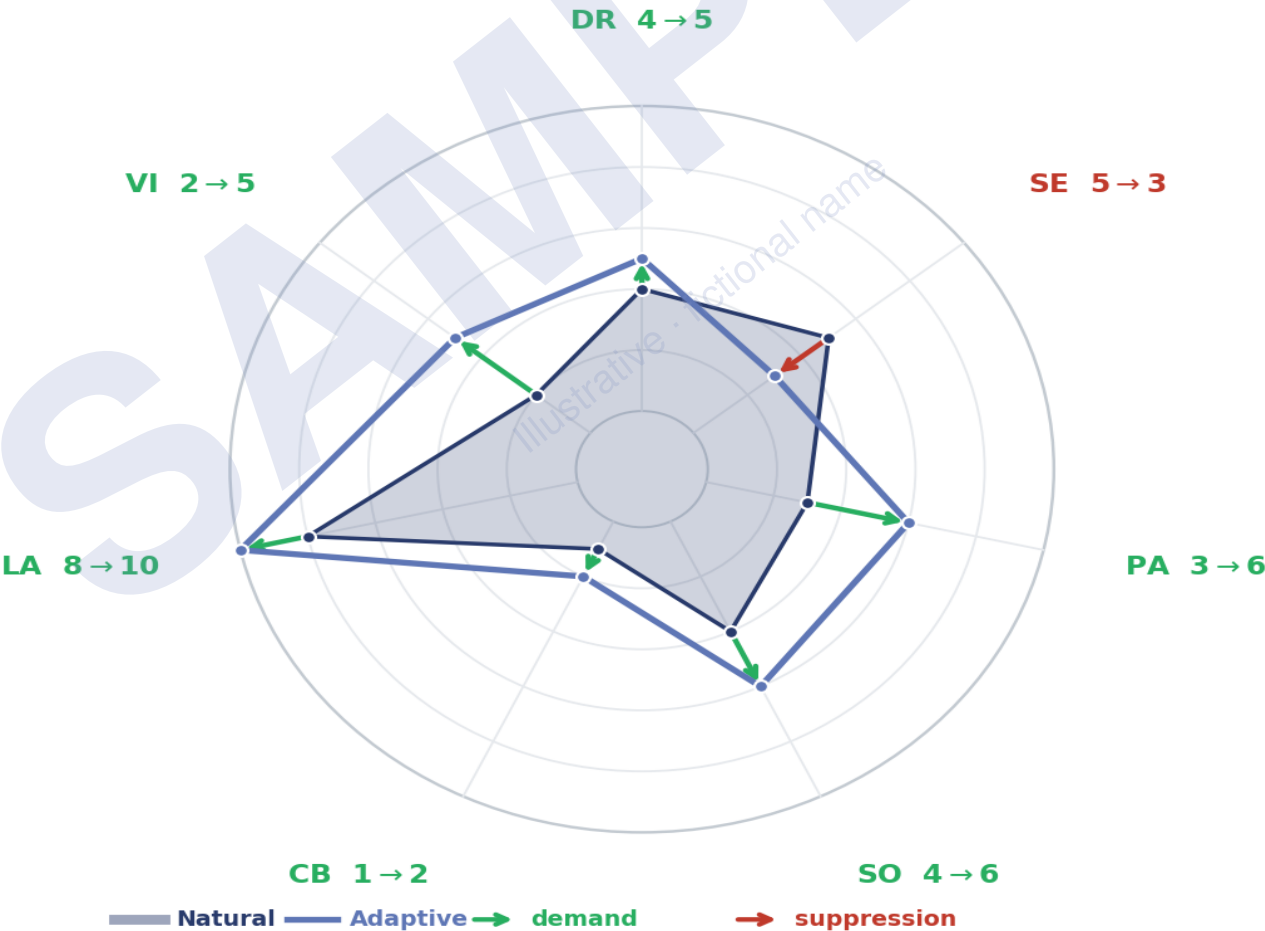

Individual Profile: Camille Beaumont

AMBASSADOR

Strength Themes:
Teamwork · Judgment · Social Intelligence

Pattern: Ambassador

Camille Beaumont is socially intelligent, strategically articulate, and naturally persuasive, moves people and ideas forward through relationship and communication.

ADAPTATION LOAD	SHAPE	▲ TOP DEMAND	▼ TOP SUPPRESSION	STRAIN
Medium	Bidirectional	PA Pace	SE Social	Low
7 of 7 dimensions shift	demand-spiked	3→6 (Moderate)	5→3 (Moderate)	over-extension

Your Natural Archetype: Ambassador

The Ambassador is the diplomatic integrator, high on nearly everything, with people-warmth and structure both present. They are the connector who can also organize: trusted to represent, to bridge groups, and to hold a coalition together because they speak every dialect of the field. Value is integration and trust, they reconcile competing interests and keep diverse stakeholders aligned. Friction is less about any one weakness and more about spread: with strengths everywhere, Ambassadors risk over-committing and carrying too much, and can struggle to protect deep-focus time.

Field position. The Ambassador sits in the Flow region of the value-stream field (connecting, coordinating, and building), and carries the work in a manner that is people-led and social.

Typical signature. The typical profile of people who match Ambassador (seven LDNA dimensions, scored 0–10): elevated on CB (8), SE (7), SO (7), VI (7), DR (7).

Trait anchor. Grounded in Extraversion, Agreeableness, and Conscientiousness (Five-Factor Model).

How Camille Differs from the Typical Ambassador

Every Ambassador shares the broad pattern above. Compared with that typical Ambassador signature, Camille's natural profile stands apart on the dimensions below, each more than two points from the typical profile, the traits that make this profile distinct within the archetype. (This compares Camille to the typical Ambassador; it is separate from the natural-to-role adaptation gap covered on the following pages.)

CB – Creative Battery: 1 vs. a typical 8 , **7 points lower.** This area runs lighter than is typical for this archetype.

VI – Vision & Ideas: 2 vs. a typical 7 , **5 points lower.** This area runs lighter than is typical for this archetype.

DR – Drive & Independence: 4 vs. a typical 7 , **3 points lower.** This area runs lighter than is typical for this archetype.

PA – Pace & Patience: 3 vs. a typical 6 , **3 points lower.** This area runs lighter than is typical for this archetype.

SO – Structure & Order: 4 vs. a typical 7 , **3 points lower.** This area runs lighter than is typical for this archetype.

Read together, these variances mean Camille occupies a distinct position within the Ambassador region rather than sitting at its center, the generic description holds, but these are the edges where Camille is individual.

How to Read Your Profile: The Seven Dimensions

Each dimension is scored 0–10 from your self-description and maps to an established construct in personality science.

DR, Drive & Independence. self-direction and assertiveness, the drive to set your own course (*Extraversion: assertiveness*) High: self-directed, drives own agenda; low: collaborative, takes direction.

SE, Social Energy. outward, people-directed energy, warmth and expressiveness (*Extraversion: enthusiasm + Agreeableness: compassion*) High: outgoing, energized by people; low: reserved, task-focused.

PA, Pace & Patience. a steady, composed tempo and an even keel under pressure (*Emotional stability (low volatility)*) High: patient, steady under pressure; low: fast, urgent, quick to react.

SO, Structure & Order. organization, method, and follow-through on detail (*Conscientiousness: orderliness*) High: organized, methodical, process-driven; low: flexible, improvisational.

CB, Creative Battery. sustained mental energy for generating and chasing the new (*Openness (the trait behind creativity and exploration)*) High: restless idea-engine, seeks the new; low: prefers proven, settled ground.

LA, Logic & Analysis. reasoning and decisions built on evidence and objective scrutiny (*Openness/Intellect: intellect*) High: rigorous, evidence-led; low: intuitive, feel-led.

VI, Vision & Ideas. imagination, abstraction, and big-picture thinking (*Openness/Intellect: openness*) High: abstract, big-picture; low: concrete, execution-focused.

The Adaptation Gap: What It Means

The adaptation gap is the distance between your natural disposition, who you are at rest, and what the current role asks of you day to day. Across the seven dimensions you carry a **medium adaptation load**, and the role pulls in two directions at once, holding back traits that come naturally to you while calling for behaviors that do not. The table below sets each dimension's natural and role-required level side by side on the same 0–10 scale, so the size and direction of every shift is visible at a glance.

Dimension	Natural	Adaptive	Gap	Interpretation
DR – Drive & Independence	4	5	Slight	Role asks for slightly more assertiveness, ownership, and independent drive, a minor, low-cost adjustment.
SE – Social Energy	5	3	Moderate	Natural level is moderately compressed, the role calls for a more task-focused, solitary working mode with less social output.
PA – Pace & Patience	3	6	Moderate	Role calls for noticeably slower, more patient and deliberate pacing, a moderate, ongoing stretch.
SO – Structure & Order	4	6	Moderate	Role calls for noticeably more structure, process discipline, and methodical order, a moderate, ongoing stretch.
CB – Creative Battery	1	2	Slight	Role asks for slightly more sustained creative and mental output, a minor, low-cost adjustment.
LA – Logic & Analysis	8	10	Moderate	Role calls for noticeably more analytical rigor and data-driven reasoning, a moderate, ongoing stretch.

VI – Vision & Ideas	2	5	Moderate	Role calls for noticeably more conceptual range and big-picture thinking, a moderate, ongoing stretch.
---------------------	---	---	----------	--

Each 0–10 score reflects how saturated that dimension is across the full self-description, scaled so the strongest dimension reads

10. The Gap is the difference between the natural and role-required level, shown as a band: Slight, Moderate, or Large.

What Your Natural Levels Mean

The Gap table above reads the distance between natural and role. This reads the natural levels themselves, who Camille is at rest, before the role acts on it, strongest first.

LA – Logic & Analysis, 8/10 (very high): rigorous, evidence-led reasoning: objective and analytical, inclined to test claims against data before committing.

SE – Social Energy, 5/10 (moderate): moderate social energy: sociable when needed but equally comfortable heads-down, with relationships mattering without dominating the working style.

DR – Drive & Independence, 4/10 (moderate): a balanced drive: comfortable leading or supporting as the situation calls for, asserting when it matters without needing to own everything.

SO – Structure & Order, 4/10 (moderate): moderate structure: can impose order when a task needs it but does not require fixed process to function, balancing method with flexibility.

PA – Pace & Patience, 3/10 (low): a fast, urgent tempo: quick to act and energized by pace, and can find slow, deliberate environments frustrating.

VI – Vision & Ideas, 2/10 (low): a concrete, present-focused orientation: grounded in the tangible and immediate, preferring execution and what-is to speculation and what-if.

CB – Creative Battery, 1/10 (very low): a contained creative battery: energy is best spent on proven ground rather than constant reinvention, preferring depth on the known to chasing the new.

Adaptation Shape

Before the detail: the overall shape of Camille's adaptation is **bidirectional**, the most effortful pattern, the role both demands qualities Camille must reach for and suppresses qualities they would naturally express, pulling in two directions at once. The narrative below traces how that plays out dimension by dimension.

The Work Mask: The Adaptation Story

Camille Beaumont carries a **medium adaptation load** between who they are naturally and what their role requires; the role pulls in two directions at once, holding back traits that come naturally to Camille while calling for behaviors that do not.

The role pushes hardest on **PA – Pace & Patience** (patience and deliberate pacing that doesn't match their natural tempo) and **VI – Vision & Ideas** (conceptual thinking and vision-setting outside their natural frame), followed by **SO – Structure & Order** (discipline, process adherence, and methodical organization that isn't instinctive). These are non-natural performances that cost daily energy.

For an Ambassador, this adaptation pattern means deeply analytical or process-intensive work without a relational dimension, or roles requiring sustained solitary focus. The mask is real, and so is the daily cost, sustainability depends on whether recovery matches expenditure.

Strain Signal: Over-extension vs. Suppression

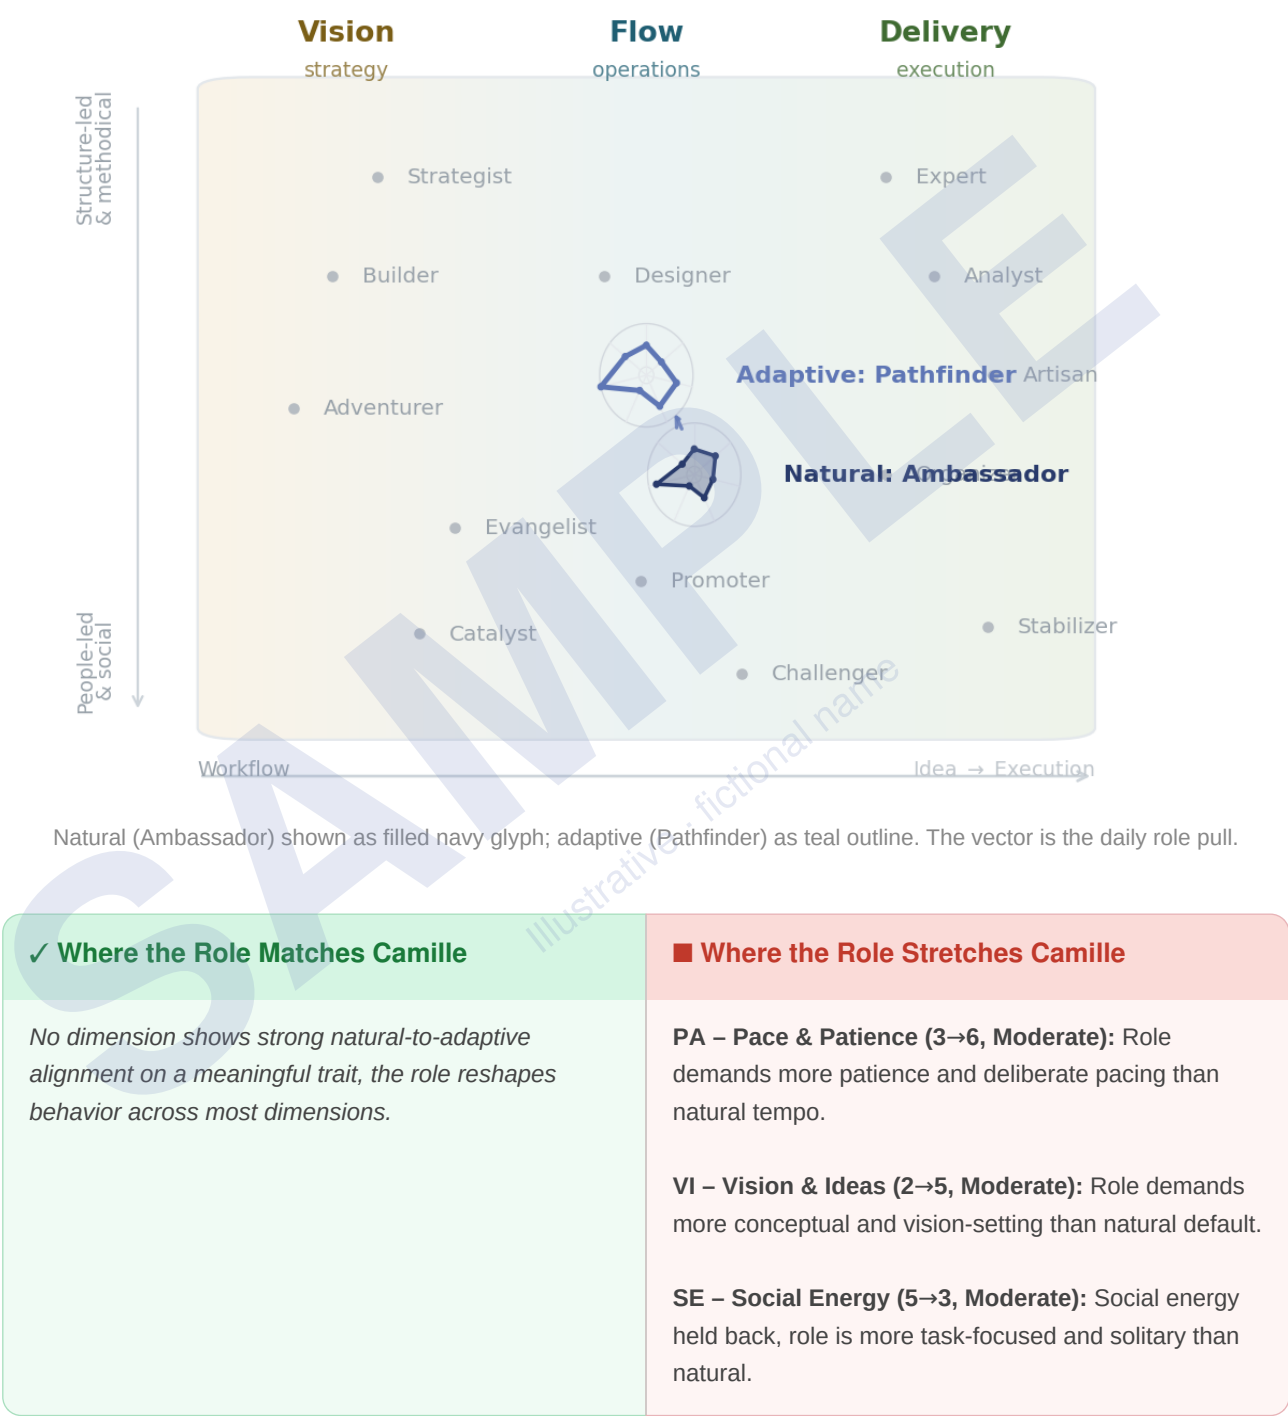

Strain signal: Low. Leaning toward the over-extension direction. The role calls for more output, pace, or arousal than the natural system settles at (the enactment or “running hot” pattern), the direction associated with exhaustion. The lever is pacing, recovery, and reducing sustained demand.

The Adapted Pattern: Pathfinder

Under the demands of the current role, Camille’s profile shifts toward the **Pathfinder** pattern: the Pathfinder is the analytical navigator, logic and structure pointed at finding the route through. Where the Designer balances vision and build, the Pathfinder leads with rigor: high logic anchored by real structure, capable of charting a disciplined path through complex, ambiguous terrain. Sitting at the center of the field, they bridge strategy and execution. Their value is grounded problem-solving: analysis that produces a workable plan, not just a model. Friction comes from purely intuitive, low-structure environments and from heavy front-of-house social demand that pulls them off the analytical work.

The distance between Camille’s natural **Ambassador** and adapted **Pathfinder** is the role pull made visible, the further apart they sit, the more the role is asking Camille to be someone other than their natural self.

LDNA Value-Stream Field

Profile Narrative & Recommendations

Camille’s Strongest Value to the Organization

Camille Beaumont adds the most value when building the human architecture of organizations, the trust, alignment, and relationships that make strategy executable. They translate complex ideas into language that moves people.

Where Camille Experiences Friction in This Role

The clearest friction point is deeply analytical or process-intensive work without a relational dimension, or roles requiring sustained solitary focus. The largest single adaptation cost lands on **PA – Pace & Patience** (performed beyond natural baseline), this is where energy leaks daily.

Practical Recommendations

For Camille Beaumont:

- Anchor influence in substance, relationships open doors, but credibility keeps them open.
- Be intentional about where relational energy is spent; not every stakeholder relationship needs the same depth.
- Build systems for solo work (time-blocks, distraction-free environments) since sustained focus doesn't come naturally.
- Use communication strength to make other people's ideas land, not just your own, that multiplies impact.

For Camille Beaumont's Leader:

- Put them in roles where alignment, buy-in, and cross-functional coordination are the bottleneck.
- Don't isolate them in back-office analytical work, that wastes their highest-value capability.
- Use them to translate strategy into language that frontline teams can act on.
- Their read on people and political dynamics is a genuine intelligence asset, ask for it explicitly.

Complementary Archetypes

Camille's profile runs lightest in **Creative Battery and Vision & Ideas**. The archetypes below lead with strength in exactly those areas, so they tend to complement Camille on a team, covering the dimensions Camille would otherwise have to stretch into, while Camille contributes the strengths they lack.

Promoter. The Promoter is the expressive connector, warmth and enthusiasm fused with idea-energy. Covers CB, VI.

Evangelist. The Evangelist is the Vision-led belief-champion: they win people to an idea or mission through conviction and enthusiasm. Covers CB, VI.

Adventurer. The Adventurer is the bold, fast-moving originator at the leading edge of the field, high drive harnessed to ideas and reasoning, with little patience for structure. Covers CB, VI.

This is general, archetype-level complementarity drawn from where Camille's profile is lightest; it is not a validated pairing. A team report assesses real complementarity against the actual people on Camille's team, including shared blind spots this view cannot see.

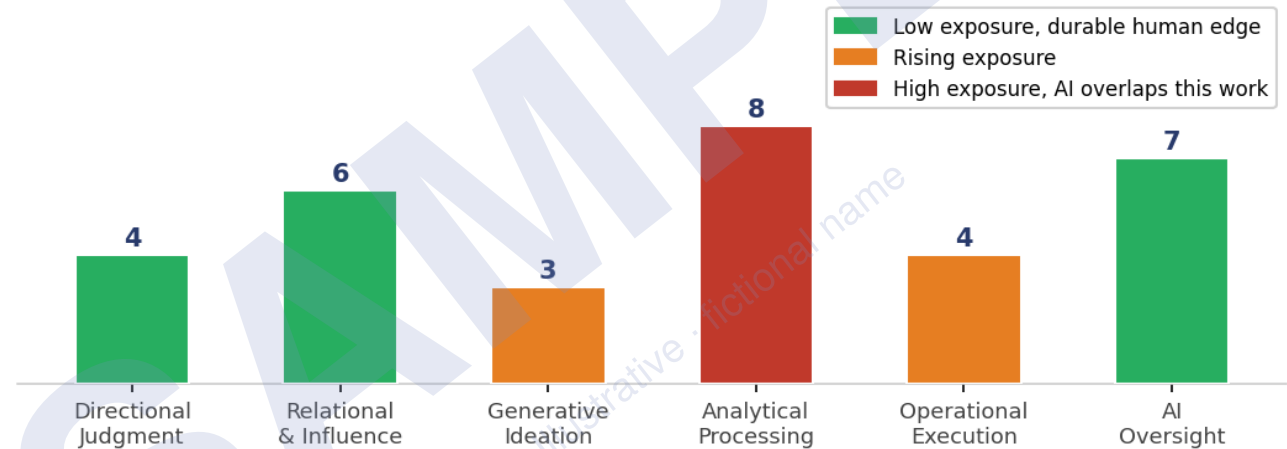

Artificial Intelligence (AI): How This Profile Meets AI

Artificial Intelligence is changing which parts of work stay valuable. This section estimates how exposed your work is to automation and where to invest so your contribution stays durable. **Archetype Exposure** is the baseline automation exposure for your pattern. **Your Durable Edge** is your strength in the areas AI struggles to replicate. **AI-Oversight Readiness** is your capacity to direct and check AI tools. The move is to protect your low-exposure strengths and, in the higher-exposure areas, shift from doing the work to directing and validating it.

Archetype Exposure	Your Durable Edge	AI-Oversight Readiness
VERY LOW	6/10	7/10

Archetype Exposure is the same for every Ambassador. Your Durable Edge, AI-Oversight Readiness, and every bar below are Camille's individual profile.

AI Exposure Profile, your strength (height) by the work's AI exposure (color)

Bar height is Camille's strength in each area; bar color is that area's intrinsic AI exposure, green is durable human work, amber is rising exposure, red is work AI increasingly performs. Exposure is a property of the work and is the same for everyone; the heights are Camille's own.

Camille's AI-Exposure Breakdown

Camille's most durable, low-exposure strengths are **oversight and relational & influence**, where human judgment is hardest for AI to replicate. Each of the six areas below carries its own AI-exposure level and a specific move given Camille's strength in it.

Directional Judgment [LOW exposure] · Camille:4/10. Setting direction and owning decisions under genuine uncertainty, choosing what matters when there is no clean answer, and being accountable for the call. AI can lay out options and trade-offs, but the accountable decision still belongs to a person, which keeps this low-exposure. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Relational & Influence [VERY LOW exposure] · Camille:6/10. Building trust, persuading, navigating conflict, and aligning people, the human-to-human work of moving an organization. This is the most durable capability in

every current exposure study; AI barely touches it. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Generative Ideation [MED-HIGH exposure] · Camille:3/10. Producing novel ideas, framings, drafts, and creative synthesis, generating the raw material of new thinking. Generative models are native to this work, so it is now a high-movement exposure zone; the durable part is taste and judgment about which ideas matter, not raw generation.

Analytical Processing [HIGH exposure] · Camille:8/10. Structured analysis, data interpretation, evidence evaluation, and documentation, turning information into structured conclusions. This is the single most AI-exposed facet of knowledge work today; computer- and math-type tasks dominate real-world AI usage.

What to do: This is work AI increasingly performs, and where your effort leaks. The move is from producing the analysis by hand to commissioning and validating it: build fluency with data-analysis assistants with code execution, and citation-linked research agents.

Operational Execution [MED-HIGH exposure] · Camille:4/10. Running repeatable systems, coordinating moving parts, and keeping process throughput steady. Workflow and agentic automation targets exactly this layer, so routine coordination is increasingly automatable.

AI Oversight [LOW exposure] · Camille:7/10. Judging when AI output is trustworthy, catching failure modes before they propagate, and governing how the tools are used. The shift toward augmentation actively creates demand for this, it is the capability AI exposure makes MORE valuable, not less. **What to do:** The destination. This is the one capability AI makes MORE valuable, and where every move above lands: use your oversight to direct the tools through your exposed work rather than be displaced by them.

One Development Move

Camille's top exposure is analytical processing (8/10), work AI increasingly performs. The highest-leverage move is from producing the analysis by hand to commissioning and validating it: build enough hands-on fluency with data-analysis assistants with code execution, and citation-linked research agents to judge when its output is trustworthy and when it is not, so Camille moves from doing the work to directing and validating it. Watch the jagged frontier, quiet degradation on tasks just outside the model's range, accepted through automation bias.

Because the specific tools and their capabilities change quickly, treat these categories as a starting point: Camille should keep current through their own hands-on research and by working with a coach or advisor on the best practices for their role.

Summary: Camille Beaumont is an Ambassador, socially intelligent. Their medium adaptation load represents real daily energy expenditure. At the archetype level their AI exposure is very low; their most durable, low-exposure strengths are ai oversight and relational & influence.
