

SAMPLE REPORT — illustrative output built with a fictional name; not a real individual assessment.

Leadership Drivers & Natural Aptitudes

Individual Profile: Nadia Rostova

PATHFINDER

Strength Themes:
Judgment · Perspective · Leadership

Pattern: Pathfinder

Nadia Rostova is analytically grounded, strategically oriented, and skilled at navigating complexity; they find the best route through ambiguous terrain by testing options against the evidence.

ADAPTATION LOAD	SHAPE	▲ TOP DEMAND	▼ TOP SUPPRESSION	STRAIN
Medium	Bidirectional	DR Drive	LA Logic	Minimal
6 of 7 dimensions shift	balanced	2→4 (Moderate)	10→6 (Large)	low markers

Your Natural Archetype: Pathfinder

The Pathfinder is the analytical navigator, logic and structure pointed at finding the route through. Where the Designer balances vision and build, the Pathfinder leads with rigor: high logic anchored by real structure, capable of charting a disciplined path through complex, ambiguous terrain. Sitting at the center of the field, they bridge strategy and execution. Their value is grounded problem-solving: analysis that produces a workable plan, not just a model. Friction comes from purely intuitive, low-structure environments and from heavy front-of-house social demand that pulls them off the analytical work.

Field position. The Pathfinder sits in the Flow region of the value-stream field (connecting, coordinating, and building), and carries the work in a manner that is balanced between structure-led and people-led.

Typical signature. The typical profile of people who match Pathfinder (seven LDNA dimensions, scored 0–10): elevated on LA (8), SO (7), VI (7).

Trait anchor. Grounded in Intellect with strong Orderliness (Five-Factor Model).

How Nadia Differs from the Typical Pathfinder

Every Pathfinder shares the broad pattern above. Compared with that typical Pathfinder signature, Nadia's natural profile stands apart on the dimensions below, each more than two points from the typical profile, the traits that make this profile distinct within the archetype. (This compares Nadia to the typical Pathfinder; it is separate from the natural-to-role adaptation gap covered on the following pages.)

CB – Creative Battery: 1 vs. a typical 6 , **5 points lower.** This area runs lighter than is typical for this archetype.

DR – Drive & Independence: 2 vs. a typical 6 , **4 points lower.** This area runs lighter than is typical for this archetype.

PA – Pace & Patience: 1 vs. a typical 5 , **4 points lower.** This area runs lighter than is typical for this archetype.

SO – Structure & Order: 3 vs. a typical 7 , **4 points lower.** This area runs lighter than is typical for this archetype.

SE – Social Energy: 1 vs. a typical 4 , **3 points lower.** This area runs lighter than is typical for this archetype.

VI – Vision & Ideas: 4 vs. a typical 7 , **3 points lower.** This area runs lighter than is typical for this archetype.

Read together, these variances mean Nadia occupies a distinct position within the Pathfinder region rather than sitting at its center, the generic description holds, but these are the edges where Nadia is individual.

How to Read Your Profile: The Seven Dimensions

Each dimension is scored 0–10 from your self-description and maps to an established construct in personality science.

DR, Drive & Independence. self-direction and assertiveness, the drive to set your own course (*Extraversion: assertiveness*) High: self-directed, drives own agenda; low: collaborative, takes direction.

SE, Social Energy. outward, people-directed energy, warmth and expressiveness (*Extraversion: enthusiasm + Agreeableness: compassion*) High: outgoing, energized by people; low: reserved, task-focused.

PA, Pace & Patience. a steady, composed tempo and an even keel under pressure (*Emotional stability (low volatility)*) High: patient, steady under pressure; low: fast, urgent, quick to react.

SO, Structure & Order. organization, method, and follow-through on detail (*Conscientiousness: orderliness*) High: organized, methodical, process-driven; low: flexible, improvisational.

CB, Creative Battery. sustained mental energy for generating and chasing the new (*Openness (the trait behind creativity and exploration)*) High: restless idea-engine, seeks the new; low: prefers proven, settled ground.

LA, Logic & Analysis. reasoning and decisions built on evidence and objective scrutiny (*Openness/Intellect: intellect*) High: rigorous, evidence-led; low: intuitive, feel-led.

VI, Vision & Ideas. imagination, abstraction, and big-picture thinking (*Openness/Intellect: openness*) High: abstract, big-picture; low: concrete, execution-focused.

The Adaptation Gap: What It Means

The adaptation gap is the distance between your natural disposition, who you are at rest, and what the current role asks of you day to day. Across the seven dimensions you carry a **medium adaptation load**, and the role pulls in two directions at once, holding back traits that come naturally to you while calling for behaviors that do not. The table below sets each dimension's natural and role-required level side by side on the same 0–10 scale, so the size and direction of every shift is visible at a glance.

Dimension	Natural	Adaptive	Gap	Interpretation
DR – Drive & Independence	2	4	Moderate	Role calls for noticeably more assertiveness, ownership, and independent drive, a moderate, ongoing stretch.
SE – Social Energy	1	0	Slight	Role draws slightly less here, a more task-focused, solitary working mode with less social output. A minor, low-cost adjustment.
PA – Pace & Patience	1	0	Slight	Role draws slightly less here, a faster, more reactive tempo than the naturally patient pace. A minor, low-cost adjustment.
SO – Structure & Order	3	5	Moderate	Role calls for noticeably more structure, process discipline, and methodical order, a moderate, ongoing stretch.
CB – Creative Battery	1	2	Slight	Role asks for slightly more sustained creative and mental output, a minor, low-cost adjustment.
LA – Logic & Analysis	10	6	Large	A strong natural trait is markedly compressed, the role calls for faster decisions on thinner data, with less exhaustive analysis. A primary energy drain.

VI – Vision & Ideas	4	4	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.
---------------------	---	---	---------	---

Each 0–10 score reflects how saturated that dimension is across the full self-description, scaled so the strongest dimension reads 10. The Gap is the difference between the natural and role-required level, shown as a band: Slight, Moderate, or Large.

What Your Natural Levels Mean

The Gap table above reads the distance between natural and role. This reads the natural levels themselves, who Nadia is at rest, before the role acts on it, strongest first.

- LA – Logic & Analysis, 10/10 (very high):** rigorous, evidence-led reasoning: objective and analytical, inclined to test claims against data before committing.
- VI – Vision & Ideas, 4/10 (moderate):** a balanced horizon: thinks in concepts or concretes as the work requires, moving between the big picture and the detail.
- SO – Structure & Order, 3/10 (low):** a low-structure, improvisational default: comfortable operating without fixed process, and can find heavy documentation and procedure constraining.
- DR – Drive & Independence, 2/10 (low):** a collaborative, low-assertion default: prefers clear direction and shared ownership to driving the agenda alone, and works best with a defined mandate.
- SE – Social Energy, 1/10 (very low):** a reserved, self-contained style: energy goes to the task more than the room, and is most effective one-to-one or in writing rather than through constant interaction.
- PA – Pace & Patience, 1/10 (very low):** a fast, urgent tempo: quick to act and energized by pace, and can find slow, deliberate environments frustrating.
- CB – Creative Battery, 1/10 (very low):** a contained creative battery: energy is best spent on proven ground rather than constant reinvention, preferring depth on the known to chasing the new.

Adaptation Shape

Before the detail: the overall shape of Nadia’s adaptation is **bidirectional**, the most effortful pattern, the role both demands qualities Nadia must reach for and suppresses qualities they would naturally express, pulling in two directions at once. The narrative below traces how that plays out dimension by dimension.

The Work Mask: The Adaptation Story

Nadia Rostova carries **amedium adaptation load** between who they are naturally and what their role requires; the role pulls in two directions at once, holding back traits that come naturally to Nadia while calling for behaviors that do not.

The role pushes hardest on **DR – Drive & Independence** (assertiveness, ownership, and competitive drive, territory that doesn't come naturally) and **SO – Structure & Order** (discipline, process adherence, and methodical organization that isn't instinctive). These are non-natural performances that cost daily energy.

The most acute suppression of a signature strength sits on **LA – Logic & Analysis** (10→6, Large suppression), a strong natural trait being held back at work. Caged signature strengths carry their own daily cost even when they don't feel like active effort.

For a Pathfinder, this adaptation pattern means highly repetitive execution tasks or roles requiring extensive stakeholder management without analytical depth. The mask is real, and so is the daily cost, sustainability

depends on whether recovery matches expenditure.

Strain Signal: Over-extension vs. Suppression

Strain signal: Minimal. Few strain markers are present and the role does not appear to cage the natural energy, so neither the over-extension nor the suppression pattern is pronounced.

The Adapted Pattern: Strategist

Under the demands of the current role, Nadia's profile shifts toward the **Strategist** pattern: the Strategist is the independent system-thinker, analytical firepower directed by strong will, working best on the hardest problems with room to think. Where the Adventurer improvises, the Strategist plans: they diagnose complex situations, build logical frameworks, and design scalable approaches, preferring focused depth over breadth. Their value is clarity under complexity and objective judgment others can build on. Friction comes from being asked to operate with more day-to-day organization and documentation than feels natural, and from people-management layers that pull them out of the analysis. The low CB is the tell, the Strategist is a reasoner, not a perpetual ideator; their edge is rigor, not novelty.

The distance between Nadia's natural **Pathfinder** and adapted **Strategist** is the role pull made visible, the further apart they sit, the more the role is asking Nadia to be someone other than their natural self.

LDNA Value-Stream Field

Natural (Pathfinder) shown as filled navy glyph; adaptive (Strategist) as teal outline. The vector is the daily role pull.

✓ Where the Role Matches Nadia	■ Where the Role Stretches Nadia
VI – Vision & Ideas (4→4, Aligned): Role matches natural appetite for concepts and big-picture thinking.	LA – Logic & Analysis (10→6, Large): Analytical depth compressed, decisions move faster than feels rigorous. DR – Drive & Independence (2→4, Moderate): Role demands more assertiveness and ownership than comes naturally. SO – Structure & Order (3→5, Moderate): Role demands more discipline and process adherence than is instinctive.

Profile Narrative & Recommendations

Nadia’s Strongest Value to the Organization

Nadia Rostova adds the most value when translating strategic ambiguity into actionable direction, synthesising complex information into clear priorities, and building the analytical foundation for sound decisions.

Where Nadia Experiences Friction in This Role

The clearest friction point is highly repetitive execution tasks or roles requiring extensive stakeholder management without analytical depth. The largest single adaptation cost lands on **LA – Logic & Analysis** (natural strength compressed), this is where energy leaks daily.

Practical Recommendations

For Nadia Rostova:

- Use analytical strength to simplify complexity for others, the value is in the translation, not just the analysis.
- Build structured decision frameworks that can be reused, reducing the cognitive load of recurring judgment calls.
- Invest in stakeholder communication even when it feels redundant, others need to see the path you've already mapped.
- Protect time for synthesis; avoid getting pulled into execution tasks that don't leverage analytical depth.

For Nadia Rostova's Leader:

- Deploy them on problems where the path forward is unclear and data needs to be turned into direction.
- They bridge strategy and execution, use them as translators between senior leadership and operational teams.
- Don't overload them with repetitive tasks; their value compounds when focused on complex problem navigation.
- Give them access to information early; they work best when they can synthesise before the deadline hits.

Complementary Archetypes

Nadia's profile runs lightest in **Social Energy and Pace & Patience**. The archetypes below lead with strength in exactly those areas, so they tend to complement Nadia on a team, covering the dimensions Nadia would otherwise have to stretch into, while Nadia contributes the strengths they lack.

Ambassador. The Ambassador is the diplomatic integrator, high on nearly everything, with people-warmth and structure both present. *Covers SE.*

Promoter. The Promoter is the expressive connector, warmth and enthusiasm fused with idea-energy. *Covers SE.*

Stabilizer. The Stabilizer is the steady anchor: patience and composure combined with relational warmth. *Covers PA.*

This is general, archetype-level complementarity drawn from where Nadia's profile is lightest; it is not a validated pairing. A team report assesses real complementarity against the actual people on Nadia's team, including shared blind spots this view cannot see.

Artificial Intelligence (AI): How This Profile Meets AI

Artificial Intelligence is changing which parts of work stay valuable. This section estimates how exposed your work is to automation and where to invest so your contribution stays durable. **Archetype Exposure** is the baseline automation exposure for your pattern. **Your Durable Edge** is your strength in the areas AI struggles to replicate. **AI-Oversight Readiness** is your capacity to direct and check AI tools. The move is to protect your low-exposure strengths and, in the higher-exposure areas, shift from doing the work to directing and validating it.

Archetype Exposure	Your Durable Edge	AI-Oversight Readiness
LOW-MEDIUM	4/10	7/10

Archetype Exposure is the same for every Pathfinder. Your Durable Edge, AI-Oversight Readiness, and every bar below are Nadia's individual profile.

AI Exposure Profile, your strength (height) by the work's AI exposure (color)

Bar height is Nadia's strength in each area; bar color is that area's intrinsic AI exposure, green is durable human work, amber is rising exposure, red is work AI increasingly performs. Exposure is a property of the work and is the same for everyone; the heights are Nadia's own.

Nadia's AI-Exposure Breakdown

Nadia's most durable, low-exposure strengths are **ai oversight and directional judgment**, where human judgment is hardest for AI to replicate. Each of the six areas below carries its own AI-exposure level and a specific move given Nadia's strength in it.

Directional Judgment [LOW exposure] · Nadia: **3/10**. Setting direction and owning decisions under genuine uncertainty, choosing what matters when there is no clean answer, and being accountable for the call. AI can lay out options and trade-offs, but the accountable decision still belongs to a person, which keeps this low-exposure. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Relational & Influence [VERY LOW exposure] · Nadia: **1/10**. Building trust, persuading, navigating conflict, and aligning people, the human-to-human work of moving an organization. This is the most durable capability in

every current exposure study; AI barely touches it. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Generative Ideation [MED-HIGH exposure] · Nadia: **3/10**. Producing novel ideas, framings, drafts, and creative synthesis, generating the raw material of new thinking. Generative models are native to this work, so it is now a high-movement exposure zone; the durable part is taste and judgment about which ideas matter, not raw generation.

Analytical Processing [HIGH exposure] · Nadia: **7/10**. Structured analysis, data interpretation, evidence evaluation, and documentation, turning information into structured conclusions. This is the single most AI-exposed facet of knowledge work today; computer- and math-type tasks dominate real-world AI usage.

What to do: This is work AI increasingly performs, and where your effort leaks. The move is from producing the analysis by hand to commissioning and validating it: build fluency with data-analysis assistants with code execution, and citation-linked research agents.

Operational Execution [MED-HIGH exposure] · Nadia: **2/10**. Running repeatable systems, coordinating moving parts, and keeping process throughput steady. Workflow and agentic automation targets exactly this layer, so routine coordination is increasingly automatable.

AI Oversight [LOW exposure] · Nadia: **7/10**. Judging when AI output is trustworthy, catching failure modes before they propagate, and governing how the tools are used. The shift toward augmentation actively creates demand for this, it is the capability AI exposure makes MORE valuable, not less. **What to do:** The destination. This is the one capability AI makes MORE valuable, and where every move above lands: use your oversight to direct the tools through your exposed work rather than be displaced by them.

One Development Move

Nadia's top exposure is analytical processing (7/10), work AI increasingly performs. The highest-leverage move is from producing the analysis by hand to commissioning and validating it: build enough hands-on fluency with data-analysis assistants with code execution, and citation-linked research agents to judge when its output is trustworthy and when it is not, so Nadia moves from doing the work to directing and validating it. Watch the jagged frontier, quiet degradation on tasks just outside the model's range, accepted through automation bias.

Because the specific tools and their capabilities change quickly, treat these categories as a starting point: Nadia should keep current through their own hands-on research and by working with a coach or advisor on the best practices for their role.

Summary: Nadia Rostova is a Pathfinder, analytically grounded. Their medium adaptation load represents real daily energy expenditure. At the archetype level their AI exposure is low-medium; their most durable, low-exposure strengths are ai oversight and directional judgment.
