

SAMPLE REPORT — illustrative output built with a fictional name; not a real individual assessment.

Leadership Drivers & Natural Aptitudes

Individual Profile: Yusuf Demirci

PATHFINDER

Strength Themes:
Judgment · Perspective · Prudence

Pattern: Pathfinder

Yusuf Demirci is analytically grounded, strategically oriented, and skilled at navigating complexity; they find the best route through ambiguous terrain by testing options against the evidence.

ADAPTATION LOAD	SHAPE	▲ TOP DEMAND	▼ TOP SUPPRESSION	STRAIN
Heavy 5 of 7 dimensions shift	Suppression-weighted suppression-spiked	,	VI Vision 9→4 (Large)	Moderate mixed signals

Your Natural Archetype: Pathfinder

The Pathfinder is the analytical navigator, logic and structure pointed at finding the route through. Where the Designer balances vision and build, the Pathfinder leads with rigor: high logic anchored by real structure, capable of charting a disciplined path through complex, ambiguous terrain. Sitting at the center of the field, they bridge strategy and execution. Their value is grounded problem-solving: analysis that produces a workable plan, not just a model. Friction comes from purely intuitive, low-structure environments and from heavy front-of-house social demand that pulls them off the analytical work.

Field position. The Pathfinder sits in the Flow region of the value-stream field (connecting, coordinating, and building), and carries the work in a manner that is balanced between structure-led and people-led.

Typical signature. The typical profile of people who match Pathfinder (seven LDNA dimensions, scored 0–10): elevated on LA (8), SO (7), VI (7).

Trait anchor. Grounded in Intellect with strong Orderliness (Five-Factor Model).

How Yusuf Differs from the Typical Pathfinder

Every Pathfinder shares the broad pattern above. Compared with that typical Pathfinder signature, Yusuf's natural profile stands apart on the dimensions below, each more than two points from the typical profile, the traits that make this profile distinct within the archetype. (This compares Yusuf to the typical Pathfinder; it is separate from the natural-to-role adaptation gap covered on the following pages.)

SO – Structure & Order: 10 vs. a typical 7 , **3 points higher**. This is a strength expressed more strongly than most of this archetype.

Read together, these variances mean Yusuf occupies a distinct position within the Pathfinder region rather than sitting at its center, the generic description holds, but these are the edges where Yusuf is individual.

How to Read Your Profile: The Seven Dimensions

Each dimension is scored 0–10 from your self-description and maps to an established construct in personality science.

- DR, Drive & Independence.** self-direction and assertiveness, the drive to set your own course (*Extraversion: assertiveness*) High: self-directed, drives own agenda; low: collaborative, takes direction.
- SE, Social Energy.** outward, people-directed energy, warmth and expressiveness (*Extraversion: enthusiasm + Agreeableness: compassion*) High: outgoing, energized by people; low: reserved, task-focused.
- PA, Pace & Patience.** a steady, composed tempo and an even keel under pressure (*Emotional stability (low volatility)*) High: patient, steady under pressure; low: fast, urgent, quick to react.
- SO, Structure & Order.** organization, method, and follow-through on detail (*Conscientiousness: orderliness*) High: organized, methodical, process-driven; low: flexible, improvisational.
- CB, Creative Battery.** sustained mental energy for generating and chasing the new (*Openness (the trait behind creativity and exploration)*) High: restless idea-engine, seeks the new; low: prefers proven, settled ground.
- LA, Logic & Analysis.** reasoning and decisions built on evidence and objective scrutiny (*Openness/Intellect: intellect*) High: rigorous, evidence-led; low: intuitive, feel-led.
- VI, Vision & Ideas.** imagination, abstraction, and big-picture thinking (*Openness/Intellect: openness*) High: abstract, big-picture; low: concrete, execution-focused.

The Adaptation Gap: What It Means

The adaptation gap is the distance between your natural disposition, who you are at rest, and what the current role asks of you day to day. Across the seven dimensions you carry a **heavy adaptation load**, and the strain leans toward natural traits you hold back at work. The table below sets each dimension's natural and role-required level side by side on the same 0–10 scale, so the size and direction of every shift is visible at a glance.

Dimension	Natural	Adaptive	Gap	Interpretation
DR – Drive & Independence	7	4	Moderate	Natural level is moderately compressed, the role calls for more deference to authority and less independent assertion.
SE – Social Energy	5	4	Slight	Role draws slightly less here, a more task-focused, solitary working mode with less social output. A minor, low-cost adjustment.
PA – Pace & Patience	6	2	Large	A strong natural trait is markedly compressed, the role calls for a faster, more reactive tempo than the naturally patient pace. A primary energy drain.
SO – Structure & Order	10	10	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.
CB – Creative Battery	6	3	Moderate	Natural level is moderately compressed, the role calls for a narrower, more contained band of mental and creative output.
LA – Logic & Analysis	8	8	Aligned	Aligned, the role level matches the natural level. No adaptation cost on this dimension.

VI – Vision & Ideas	9	4	Large	A strong natural trait is markedly compressed, the role calls for a more concrete, execution-first focus with less big-picture ideation. A primary energy drain.
---------------------	---	---	-------	--

Each 0–10 score reflects how saturated that dimension is across the full self-description, scaled so the strongest dimension reads

10. The Gap is the difference between the natural and role-required level, shown as a band: Slight, Moderate, or Large.

What Your Natural Levels Mean

The Gap table above reads the distance between natural and role. This reads the natural levels themselves, who Yusuf is at rest, before the role acts on it, strongest first.

SO – Structure & Order, 10/10 (very high): a strong pull toward structure: organized, methodical, and detail- and process-driven, with follow-through and order coming instinctively.

VI – Vision & Ideas, 9/10 (very high): a strongly conceptual, big-picture orientation: abstract, future-facing, and drawn to ideas and possibility over the concrete here-and-now.

LA – Logic & Analysis, 8/10 (very high): rigorous, evidence-led reasoning: objective and analytical, inclined to test claims against data before committing.

DR – Drive & Independence, 7/10 (high): a strong, self-directed drive: sets the agenda, acts independently, and resists being managed closely. Ownership and autonomy are essential to engagement.

PA – Pace & Patience, 6/10 (high): a flexible tempo: can hold steady or move quickly as the moment demands, without a strong pull toward either patience or urgency.

CB – Creative Battery, 6/10 (high): a moderate creative battery: engages with new ideas without a constant need for novelty, alternating comfortably between generating and consolidating.

SE – Social Energy, 5/10 (moderate): moderate social energy: sociable when needed but equally comfortable heads-down, with relationships mattering without dominating the working style.

Adaptation Shape

Before the detail: the overall shape of Yusuf's adaptation is **suppression-weighted**, the role mainly holds natural qualities back, rather than demanding new ones. The narrative below traces how that plays out dimension by dimension.

The Work Mask: The Adaptation Story

Yusuf Demirci carries a **heavy adaptation load** between who they are naturally and what their role requires; the strain leans toward natural traits Yusuf holds back at work.

The most acute suppression of a signature strength sits on **VI – Vision & Ideas** (9→4, Large suppression), a strong natural trait being held back at work. Caged signature strengths carry their own daily cost even when they don't feel like active effort.

Other natural strengths also held back: **DR – Drive & Independence** (7→4, Moderate).

For a Pathfinder, this adaptation pattern means highly repetitive execution tasks or roles requiring extensive stakeholder management without analytical depth. The mask is real, and so is the daily cost, sustainability depends on whether recovery matches expenditure.

Strain Signal: Over-extension vs. Suppression

Strain signal: Moderate. Mixed. Both over-extension (running hot or exhaustion) and suppression (caged capacity) markers are present and can alternate. Treat both the pacing/demand lever and the autonomy/outlet lever together.

The Adapted Pattern: Analyst

Under the demands of the current role, Yusuf's profile shifts toward the **Analyst** pattern: the Analyst is the precision specialist, structure and logic fused, the data-and-detail authority of the Delivery region. Where the Expert is deep-and-procedural, the Analyst is deep-and-analytical: they bring rigor and evidence to execution, catching what others miss and grounding decisions in fact. Value is accuracy and disciplined reasoning applied to the concrete. Friction comes from speculative, low-information work, social-performance demand, and pressure to move before the analysis is sound.

The distance between Yusuf's natural **Pathfinder** and adapted **Analyst** is the role pull made visible, the further apart they sit, the more the role is asking Yusuf to be someone other than their natural self.

LDNA Value-Stream Field

Natural (Pathfinder) shown as filled navy glyph; adaptive (Analyst) as teal outline. The vector is the daily role pull.

✓ Where the Role Matches Yusuf	■ Where the Role Stretches Yusuf
SO – Structure & Order (10→10, Aligned): Role structure fits natural preference for order and method. LA – Logic & Analysis (8→8, Aligned): Role leverages natural analytical strength, strong alignment.	VI – Vision & Ideas (9→4, Large): Conceptual thinking grounded, role prioritizes execution over big-picture ideation. PA – Pace & Patience (6→2, Large): Natural patience overridden, role demands faster, more reactive tempo. DR – Drive & Independence (7→4, Moderate): Natural independence compressed, must operate within tighter authority boundaries.

Profile Narrative & Recommendations

Yusuf’s Strongest Value to the Organization

Yusuf Demirci adds the most value when translating strategic ambiguity into actionable direction, synthesising complex information into clear priorities, and building the analytical foundation for sound decisions.

Where Yusuf Experiences Friction in This Role

The clearest friction point is highly repetitive execution tasks or roles requiring extensive stakeholder management without analytical depth. The largest single adaptation cost lands on **VI – Vision & Ideas** (natural strength compressed), this is where energy leaks daily.

Practical Recommendations

For Yusuf Demirci:

- Use analytical strength to simplify complexity for others, the value is in the translation, not just the analysis.
- Build structured decision frameworks that can be reused, reducing the cognitive load of recurring judgment calls.
- Invest in stakeholder communication even when it feels redundant, others need to see the path you've already mapped.
- Protect time for synthesis; avoid getting pulled into execution tasks that don't leverage analytical depth.

For Yusuf Demirci's Leader:

- Deploy them on problems where the path forward is unclear and data needs to be turned into direction.
- They bridge strategy and execution, use them as translators between senior leadership and operational teams.
- Don't overload them with repetitive tasks; their value compounds when focused on complex problem navigation.
- Give them access to information early; they work best when they can synthesise before the deadline hits.

Complementary Archetypes

Yusuf's profile runs lightest in **Social Energy and Pace & Patience**. The archetypes below lead with strength in exactly those areas, so they tend to complement Yusuf on a team, covering the dimensions Yusuf would otherwise have to stretch into, while Yusuf contributes the strengths they lack.

Ambassador. The Ambassador is the diplomatic integrator, high on nearly everything, with people-warmth and structure both present. *Covers SE.*

Stabilizer. The Stabilizer is the steady anchor: patience and composure combined with relational warmth. *Covers PA.*

Promoter. The Promoter is the expressive connector, warmth and enthusiasm fused with idea-energy. *Covers SE.*

This is general, archetype-level complementarity drawn from where Yusuf's profile is lightest; it is not a validated pairing. A team report assesses real complementarity against the actual people on Yusuf's team, including shared blind spots this view cannot see.

Artificial Intelligence (AI): How This Profile Meets AI

Artificial Intelligence is changing which parts of work stay valuable. This section estimates how exposed your work is to automation and where to invest so your contribution stays durable. **Archetype Exposure** is the baseline automation exposure for your pattern. **Your Durable Edge** is your strength in the areas AI struggles to replicate. **AI-Oversight Readiness** is your capacity to direct and check AI tools. The move is to protect your low-exposure strengths and, in the higher-exposure areas, shift from doing the work to directing and validating it.

Archetype Exposure	Your Durable Edge	AI-Oversight Readiness
LOW-MEDIUM	7/10	8/10

Archetype Exposure is the same for every Pathfinder. Your Durable Edge, AI-Oversight Readiness, and every bar below are Yusuf's individual profile.

AI Exposure Profile, your strength (height) by the work's AI exposure (color)

Bar height is Yusuf's strength in each area; bar color is that area's intrinsic AI exposure, green is durable human work, amber is rising exposure, red is work AI increasingly performs. Exposure is a property of the work and is the same for everyone; the heights are Yusuf's own.

Yusuf's AI-Exposure Breakdown

Yusuf's most durable, low-exposure strengths are **directional judgment** and **ai oversight**, where human judgment is hardest for AI to replicate. Each of the six areas below carries its own AI-exposure level and a specific move given Yusuf's strength in it.

Directional Judgment [LOW exposure] · Yusuf: **8/10**. Setting direction and owning decisions under genuine uncertainty, choosing what matters when there is no clean answer, and being accountable for the call. AI can lay out options and trade-offs, but the accountable decision still belongs to a person, which keeps this low-exposure. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Relational & Influence [VERY LOW exposure] · Yusuf: **5/10**. Building trust, persuading, navigating conflict, and aligning people, the human-to-human work of moving an organization. This is the most durable capability in

every current exposure study; AI barely touches it. **What to do:** A durable, low-exposure edge, there is nothing to automate away here. Protect time for it and let it anchor your value as routine work automates.

Generative Ideation [MED-HIGH exposure] · Yusuf: **9/10**. Producing novel ideas, framings, drafts, and creative synthesis, generating the raw material of new thinking. Generative models are native to this work, so it is now a high-movement exposure zone; the durable part is taste and judgment about which ideas matter, not raw generation. **What to do:** This is work AI increasingly performs, and where your effort leaks. The move is from generating raw material to curating it on taste and judgment: build fluency with conversational reasoning assistants used for divergence, then human selection.

Analytical Processing [HIGH exposure] · Yusuf: **9/10**. Structured analysis, data interpretation, evidence evaluation, and documentation, turning information into structured conclusions. This is the single most AI-exposed facet of knowledge work today; computer- and math-type tasks dominate real-world AI usage. **What to do:** This is work AI increasingly performs, and where your effort leaks. The move is from producing the analysis by hand to commissioning and validating it: build fluency with data-analysis assistants with code execution, and citation-linked research agents.

Operational Execution [MED-HIGH exposure] · Yusuf: **9/10**. Running repeatable systems, coordinating moving parts, and keeping process throughput steady. Workflow and agentic automation targets exactly this layer, so routine coordination is increasingly automatable. **What to do:** This is work AI increasingly performs, and where your effort leaks. The move is from running the process to designing and supervising it: build fluency with agentic workflow automation and in-suite copilots.

AI Oversight [LOW exposure] · Yusuf: **8/10**. Judging when AI output is trustworthy, catching failure modes before they propagate, and governing how the tools are used. The shift toward augmentation actively creates demand for this, it is the capability AI exposure makes MORE valuable, not less. **What to do:** The destination. This is the one capability AI makes MORE valuable, and where every move above lands: use your oversight to direct the tools through your exposed work rather than be displaced by them.

One Development Move

Yusuf's top exposure is analytical processing (9/10), work AI increasingly performs. The highest-leverage move is from producing the analysis by hand to commissioning and validating it: build enough hands-on fluency with data-analysis assistants with code execution, and citation-linked research agents to judge when its output is trustworthy and when it is not, so Yusuf moves from doing the work to directing and validating it. Watch the jagged frontier, quiet degradation on tasks just outside the model's range, accepted through automation bias.

Because the specific tools and their capabilities change quickly, treat these categories as a starting point: Yusuf should keep current through their own hands-on research and by working with a coach or advisor on the best practices for their role.

Summary: Yusuf Demirci is a Pathfinder, analytically grounded. Their heavy adaptation load represents real daily energy expenditure. At the archetype level their AI exposure is low-medium; their most durable, low-exposure strengths are directional judgment and ai oversight.
