

Leadership Drivers & Natural Aptitudes

Meridian Dynamics · Strategy Team — 6 People

SAMPLE REPORT — illustrative output built with fictional names for demonstration; not a real individual or team assessment.

VICTOR HALE Strategist · Leadership · Judgment · Perseverance	SOPHIE TRAN Catalyst · Perseverance · Curiosity · Leadership
OWEN BROOKS Builder · Leadership · Perspective · Kindness	NADIA ROSSI Designer · Perspective · Judgment · Curiosity
GRACE MBEKI Ambassador · Judgment · Perspective · Leadership	RAVI MENON Evangelist · Kindness · Creativity · Perspective

The headline. This is a 6-person team, spanning the Vision, Flow regions. Together you are strongest in social energy, logic and vision. No one naturally occupies the Delivery region.

REGIONS COVERED 2 of 3 Vision, Flow	TEAM BLIND SPOT — thinly held	STRENGTHS 7 dimensions well held	ADD A PROFILE — covers the gap
--	--	---	---

Where the team sits against the norm (Natural)

Each trait scored against the population norm on one shared ruler — bars are directly comparable between teammates.

Each teammate's natural profile as a within-person shape. Where everyone's bar on a row is short, the team shares a blind spot on that dimension.

Everyone Against the Norm

Each individual report scales that person so their strongest dimension reads 10, which makes profiles unreadable against each other. This report instead scores every teammate against the **population norm**: the chart on the previous page shows that as standard deviations from the norm, and the table below shows it as a percentile, so a single shared scale lets the whole team be read on one ruler.

Raw trait intensity on a shared ruler (Natural)

Raw intensity partly reflects how broadly a profile is expressed; the shape chart above controls for that.

Where everyone lands against the norm (percentile)

Dim	Victor	Sophie	Owen	Nadia	Grace	Ravi	Team
DR Drive	73th	90th	83th	27th	60th	47th	Covered
SE Social	56th	96th	90th	34th	72th	62th	Covered
PA Pace	34th	81th	71th	34th	59th	47th	Covered
SO Structure	24th	56th	78th	31th	64th	31th	Covered
CB Creative	44th	84th	44th	24th	59th	59th	Covered
LA Logic	92th	25th	40th	83th	83th	40th	Covered
VI Vision	42th	42th	91th	85th	66th	66th	Covered

Percentiles are each person's standing against the population norm. The Team column reads Covered (someone sits above the norm), Thin (the best is only near it) or Exposed (everyone below it). Exposed rows are tinted.

The Team on the Field

Your natural archetypes are Victor, Sophie, Owen, Nadia, Grace and Ravi as Strategist, Catalyst, Builder, Designer, Ambassador, Evangelist. On the value-stream field they cluster like this:

Where the team sits on the value-stream field

Filled glyph = each person's natural archetype; outline = where their role pulls them. Empty regions are the team's structural gaps.

A region the team does not occupy.

No one on the team sits naturally in the **Delivery** region (execution / finishing). Work that lives there gets done by stretch, not by strength — a structural gap to cover deliberately.

Where the strain sits right now

On the strain screen, Owen has headroom. Balance intense pushes accordingly — lean on the headroom, protect the ones running hot, and reopen the caged strengths rather than piling on more load.

Coverage Map: Who Anchors What

For each dimension, who the team’s go-to is and whether the capability is well held, thin, or a gap.

Dimension	Team’s go-to	Status	What it means for the team
DR Drive & Independence	Sophie (90th)	Covered	Well held — Sophie anchors it with backup (90th percentile).
SE Social Energy	Sophie (96th)	Covered	Well held — Sophie anchors it with backup (96th percentile).
PA Pace & Patience	Sophie (81th)	Covered	Well held — Sophie anchors it with backup (81th percentile).
SO Structure & Order	Owen (78th)	Covered	Well held — Owen anchors it (78th percentile).
CB Creative Battery	Sophie (84th)	Covered	Well held — Sophie anchors it (84th percentile).
LA Logic & Analysis	Victor (92th)	Covered	Well held — Victor anchors it with backup (92th percentile).
VI Vision & Ideas	Owen (91th)	Covered	Well held — Owen anchors it with backup (91th percentile).

Team strengths.

The team is well held on social energy, logic, vision, drive, creative energy, patience and structure — go-to people: social energy (Sophie); logic (Victor); vision (Owen); drive (Sophie).

AI-oversight anchor.

Victor has the team’s highest AI-oversight readiness (9/10) — the natural person to lead tool adoption and judge when automated output is trustworthy for the group.

Complementary Pairs: Who Covers Whom

A complementary pair is two teammates where one sits **above** the norm on a dimension the other sits **below** — so one naturally covers the other’s gap rather than duplicating the same strength. The 5 strongest pairings on this team are ranked below by how much their profiles interlock (and how few blind spots they share).

#	Pair	Complement	What interlocks — and what to watch
1	Sophie + Nadia Catalyst · Designer	Strong two-way	Sophie covers Nadia’s drive and creative energy; Nadia covers Sophie’s logic.
2	Sophie + Grace Catalyst · Ambassador	One-way	Grace covers Sophie’s logic.
3	Victor + Sophie Strategist · Catalyst	One-way	Victor covers Sophie’s logic.
4	Owen + Nadia Builder · Designer	One-way	Owen covers Nadia’s drive.
5	Victor + Owen Strategist · Builder	One-way	Owen covers Victor’s structure.

Lean on Sophie + Nadia first. Their strengths cover each other in both directions — the team’s most self-sufficient pairing for work that needs both sides.

Blind Spots & Points of Friction

1. Several strong drivers.

Victor, Sophie and Owen all run high on Drive — plenty of ownership, but potential contention on who owns which call. Make lanes explicit.

Quick-Reference Cards: How to Work With Each Person

One card per teammate — how to get the best from them, what drains them, and how they show up under load.

VICTOR HALE — Strategist

fast, urgent tempo · strain: burnout

✓ HOW TO COMMUNICATE

- Lead with the reasoning and the evidence — give the "why," not just the ask.
- Give them ownership and bring decisions, not just problems — let them drive.
- Frame it around the big picture and the long horizon, not only the next step.
- Keep it concise and get to the point — they move fast.

✗ WHAT TO AVOID

- Don't bury them in process or documentation for its own sake — their lightest ground.
- Don't impose slow, over-deliberate pacing — they move fast.
- Don't keep them away from analytical rigor and evidence — their role already caps this natural strength, and starving it further is what drains them; give them an outlet toward it instead.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

SOPHIE TRAN — Catalyst

steady, flexible tempo · strain: burnout

✓ HOW TO COMMUNICATE

- Give them ownership and bring decisions, not just problems — let them drive.
- Engage warmly and interactively; they run on people and connection.
- A calm, unhurried delivery lands best; they hold a steady keel.
- An unhurried, warm delivery lands better than urgency.

✗ WHAT TO AVOID

- Don't drown them in dense analysis or data scrutiny — their lightest ground.
- Don't bury them in process or documentation for its own sake — their lightest ground.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

OWEN BROOKS — Builder

balanced tempo · strain: minimal (has headroom)

✓ HOW TO COMMUNICATE

- Frame it around the big picture and the long horizon, not only the next step.
- Give them ownership and bring decisions, not just problems — let them drive.
- Engage warmly and interactively; they run on people and connection.

✗ WHAT TO AVOID

- Don't ask for constant reinvention; they prefer depth on proven ground.
- Don't drown them in dense analysis or data scrutiny — their lightest ground.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

NADIA ROSSI — Designer*fast, urgent tempo · strain: burnout***✓ HOW TO COMMUNICATE**

- Frame it around the big picture and the long horizon, not only the next step.
- Lead with the reasoning and the evidence — give the "why," not just the ask.
- Give them ownership and bring decisions, not just problems — let them drive.
- Keep it concise and get to the point — they move fast.

✗ WHAT TO AVOID

- Don't ask for constant reinvention; they prefer depth on proven ground.
- Don't demand heavy front-of-house social performance or constant small talk.
- Don't keep them away from big-picture, conceptual thinking — their role already caps this natural strength, and starving it further is what drains them; give them an outlet toward it instead.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.
- On contested calls may defer rather than seize ownership.

GRACE MBEKI — Ambassador*steady, flexible tempo · strain: mixed signals***✓ HOW TO COMMUNICATE**

- Lead with the reasoning and the evidence — give the "why," not just the ask.
- Frame it around the big picture and the long horizon, not only the next step.
- Give them ownership and bring decisions, not just problems — let them drive.
- An unhurried, warm delivery lands better than urgency.

✗ WHAT TO AVOID

- Don't ask for constant reinvention; they prefer depth on proven ground.
- Don't demand heavy front-of-house social performance or constant small talk.

■ UNDER PRESSURE

- Mixed signals — both push and drag are present.
- Withdraws into solo analysis and can over-engineer alone.
- May show restlessness or withdrawal depending on the week.
- Best lever: check which pattern is live before adjusting load.

RAVI MENON — Evangelist*steady, flexible tempo · strain: disengagement***✓ HOW TO COMMUNICATE**

- Frame it around the big picture and the long horizon, not only the next step.
- Give them ownership and bring decisions, not just problems — let them drive.
- Lead with what's new and possible; give them room to generate and reinvent.
- An unhurried, warm delivery lands better than urgency.

✗ WHAT TO AVOID

- Don't bury them in process or documentation for its own sake — their lightest ground.
- Don't impose slow, over-deliberate pacing — they move fast.

■ UNDER PRESSURE

- Has headroom — few strain markers, absorbs load without obvious overextension.
- Under real load, retreats into their strongest lane and goes heads-down.
- Best lever: a trusted peer to pressure-test before finalizing alone.

How to Work as a Team

For the team

- **Route work to the natural owner.** Let each strength flow to whoever anchors it — Sophie on social energy; Victor on logic; Owen on vision; Sophie on drive.
- **Pair complementary members.** Put Sophie (relational) with Victor (analytical) on stakeholder-heavy, evidence-driven work — front-of-house plus depth.
- **Make decision rights explicit.** It settles both tempo differences and who owns contested calls.

For the leader or coach

- **Put Victor in charge of AI tooling.** Highest oversight readiness on the team — best placed to govern how the tools get used.

Method note: per-person scores use the LDNA v21 engine. Individual reports normalize each person to their own peak; for cross-person comparison this team view instead scores every dimension against the population norm (the full set of responses collected for this assessment), so all teammates are read on one common scale. "Covered / Thin / Exposed" reads whether anyone on the team sits above, near, or below the norm on each dimension. The suggested profile is the archetype whose typical centroid best covers the team's gap. This is a screen, not a validated team-selection instrument.
